Product Overview

StreetPro Navigation Premium is a large scale digital map base containing up-to-date premium street-level vector maps, with over 40 layers of information including address ranges plus navigation attributes including, turn restrictions, segment driving directions, lane counts, speed limits, etc.

The street network is provided as a single logical table for navigation purposes as well as separated by road classification for display purposes. The premium content also includes either or both of Average Speed Profile by the time of day and Height, Width and Weight restrictions for vehicles.

What's New

Following are the country specific updates that has been implemented in this release:

Czech Republic

- House Number Ranges were updated. A total of 900 km of road geometry has received new or updated House Number Ranges.

Denmark

- Updated the Default (Legal) Speed Restriction for Denmark.

Malaysia

- Around 2000 km of roads have been added to the street network.

Finland

- Near 30000 km of new roads added in targeted locations.

Known Issues

Following is the known issue for this release:

- The "MAX_WEIGHT" information for Norway and Sweden datasets are from the 2017.09.0 vintage. The corresponding source data of newer vintage received from the vendor had some errors and we are following up with the data provider for the correction on the same.
- The "MAX_HEIGHT, MAX_WEIGHT, and MAX_WIDTH" information for Malaysia and Netherland datasets are not available in the source.
