Introduction

Financial Stress and Delinquency Score Indices is an innovative addition to our data portfolio. Pitney Bowes is committed to continually develop and build upon this state of the art data products for our customers. We have an exhaustive roadmap to ensure that we bring the best product to the market so our customers can derive highest value for their business support.

Score data is acquired from our trusted partners who have reliable sources and robust mechanisms to provide the most complete and up-to-date data available. Business data is collected from various sources.

About

Financial Stress Score (FSS):

The Financial Stress Score (FSS) predicts the likelihood that a business will seek legal relief from its creditors, cease business operations without paying all its creditors, to withdraw from business operation and leave unpaid obligations, go into receivership or reorganization, or make an arrangement for the benefit of creditors over the next 12 month period.

Scores annotated in FSS (1 – 5) represents a segmentation of the scorable universe into five distinct risk groups where a one (1) represents businesses that have the lowest probability of financial stress, and a five (5) represents businesses with the highest probability of financial stress.

Delinquency Score (DS):

The Delinquency Predictor predicts the likelihood that a company will pay in a severely delinquent manner (91+ days past term) over the next 12 months, seek legal relief from creditors, or cease operations without paying all creditors in full over the next 12 months. A severely delinquent firm is defined as a business with at least 10% of its payments are made after more than 91 days. Payments are weighted based on the total balance of accounts paid later than 91 days compared to the total balance owed.

Scores annotated in DS (1 – 5) represents a segmentation of the scorable universe into five distinct risk groups where a one (1) represents businesses that have the lowest probability of financial stress, and a five (5) represents businesses with the highest probability of financial stress.
