## Product Overview

The World Premium Points of Interest – Consumer Edition (WPPOI - CSMR) dataset provides information on the location of, and details relating to, a diverse set of consumer focused businesses, leisure hot spots and geographic features. The locational accuracy of this data has been further enhanced using Pitney Bowes Premium Spectrum Enterprise Geocoding solution to provide the most accurate location available for each Point of Interest.

Some of the feature of the WPPOI - CSMR product are:

- Focused selection of POIs that concentrate on businesses, landmarks, and services relevant to consumers.
- Drawn from the largest, globally geo-referenced POI dataset.
- The POIs are geocoded using Pitney Bowes comprehensive Global Geocoding capabilities.
- The POIs are classified using both the Pitney Bowes MiCode (providing a consumer-friendly classification across products) and the Standard Industrial Classification (SIC) culdoscopies note that both these classifications are cross-referenced. The individual POI in the dataset have hierarchical relationships between themselves and others in their ‘family’.
- The taxonomy ensures ease of use and global consistency.

The dataset enables users to make informed decisions around access to services, retail or recreational facilities, ideal for location based marketing and “find my nearest” searches.

## Coverage

WPPOI-CSMR v5.06.0 contains POIs for 174 countries. Some countries are released together in a group. The following table provides details of each country group, including the ISO3 codes (three-character ISO country codes) for each country included.

<b>COUNTRY BUNDLE</b>	<b>COUNTRY</b>	<b>ISO3</b>
Albania	Albania	ALB
Algeria	Algeria	DZA
Angola	Angola	AGO

Pitney Bowes understands that Australia has a significant volume of businesses that are self-employed, single operator, SOHO style businesses which are difficult to both monitor and ensure they are in business. Pitney Bowes is actively reviewing these businesses and will include those that we can positively identify as being “in business”. However, we believe focusing on businesses with employees that will provide our clients the most significant points of interest for their use cases, applications and business success. Australia World Premium Points of interests is built to ensure we include businesses that employ 1 or more people, this ensures that Pitney Bowes provides a product that covers a business universe which contributes 85% of Australia's economic output.

## Change Log

- Added Israel as a new country in this release.
- POI counts has increased for the following countries, Bosnia-Herzegovina (BIH), Bulgaria (BGR), Croatia (HRV), Estonia (EST), Israel (ISR), Latvia (LVA), Lithuania (LTU), Macedonia (MKD), Malta (MLT), Montenegro (MNE), Romania (ROU), Serbia (SRB), Slovakia (SVK) and Slovenia (SVN).
- Separated the ATM and Banks brandname records in USA and GBR. For example, 'NATWEST' and 'NATWEST ATM' are now two separate brandname records.
- De-Duplication exercise has been performed on all countries hence, you may find slight differences in the counts
- Enhanced the quality for 200 brands in USA. Click [here](#) for more details.
- Few brands have been updated with the new names. Click [here](#) for more details.
- False positives brandnames have been untagged.
- Latitude and Longitude values may occasionally change slightly due to geocoding enhancements.
- Applied few changes in the address components for few records and removed few junk characters from the data like, (\, <, >, %, ^, ||)

- Improved the Brand Name standardization in the data and it has been standardized for respective countries:

<b>Country</b>	<b>Brandname Counts</b>
Argentina	24
Australia	291
Bahrain	11
Canada	257
Czech Republic	14
Germany	19
Great Britain	587
Greece	13
Kuwait	16
Mexico	47
Netherlands	22
Oman	5
Poland	10
Qatar	22
Romania	10
Russia	19
Saudi Arabia	19
Slovakia	8
Spain	22
Switzerland	21
United Arab Emirates	26
United States Of America	2066

For detail view click [here](#).

## Known Issues

There are some known issues with the source data. We will strive to address these issues in subsequent releases in a timely fashion. Please contact Technical Support with any questions you may have.

This section covers known issues and behaviors that require further explanation:

- Non-Standardized attributes for few records in the countries such as, United Arab Emirates (ARE), Argentina (ARG), Bahrain (BHR), Canada (CAN), Switzerland (CHE), Czech Republic (CZE), Germany (DEU), Spain (ESP), Greece (GRC), Kuwait (KWT), Netherland (NLD), Oman (OMN), Poland (POL), Qatar (QAT), Romania (ROU), Russia (RUS), Saudi Arab (SAU) and Slovakia (SVK).
- Non Standardized formattedAddress, mainAddressLine and addressLastLine for few records in Australia.
- Some invalid values exist in the Name, areaName1, areaName2 and areaName, TradeName and Postcode column including instances where the Postcode column has values as 'zeroes'.
- Some diacritics are missing from the Name, TradeName, formattedAddress, mainAddressLine, addressLastLine, areaName1 and areaName3 columns.
- Some duplicates may be encountered in the dataset.
- There are a few instances of text truncation exist for the Name, TradeName, Business\_Line, areaName3, formattedAddress, mainAddressLine, Http, Email, Postcode and areaName2 columns.
- There are a few instances where the Employee\_Here (number of employees at the current location) count mismatches the Employee\_count (total number of employees).
- There are a few instances that have inconsistent Status\_Code and Subsidiary\_Indicator mapping.
- The Email, Http, Ticker\_symbol, and Exchange\_Name columns are not populated for many countries.
- The SIC8 (code) descriptions are undergoing updates. As a result, some values may not have any or updated description(s) and may have been removed.
- The administrative layer names of countries are not standardized. As a result, some areaname4 values may be blank. There are a few instances where different variations of the same name are encountered in the areaName1 column.
- There are few mismatches in areaName1 and Stabb field as areaName1 is not necessarily the highest hierarchical administrative region, whereas, Stabb field is the highest available administrative region.
- Mainaddressline and formattedaddress are not standardized in few records.

- There are a few instances where House number / Street Name is appearing twice in mainaddressline.
- There are a few instances where the areaname3 is populated with the name of a different admin level.
- Two ISO3 (BLM, MAF) are included in both country bundles, France(FRA) and Minor Americas(MAM).
- Encounter some corrupted characters in following 15 countries; Argentina, Austria, Belgium, Canada, Denmark, Finland, France, Germany, Netherlands, Norway, Poland, Portugal, Spain, Sweden, and Switzerland. This issue would be fixed by next release.
- Brandname standardisation is work in progress, so this may encounter some minor discrepancies.
