Summary

PostPoint® Professional offers a grid reference for every geographic postcode in the United Kingdom.

Using its detailed knowledge of the positions of individual properties to within one metre, Britain's national mapping agency, Ordnance Survey, has developed a dataset of outstanding accuracy. Each and every geographic postcode grid is designed to lie within its postcode boundary, whatever the shape of the boundary. In most cases, the grid reference will lie very close to the centre of the postcode.

Benefits

- PostPoint Professional also features the Ordnance Survey local authority ward, district, county and unitary codes.
- The dataset enables you to plan volumes for leaflet drops into postcodes and to estimate the number of private households and businesses within a postcode at a detailed level.
- PostPoint Professional contains the NHS health authority and regional health authority codes for each geographically referenced postcode.

Features

Vintage: 2011 .0G

Ordnance Survey Vintage: 2011 .0G

GREAT BRITAIN
